

**PMS100
MANUAL PERSONAL PARKING BARRIER**

PMS100 Manual Personal Parking Barrier

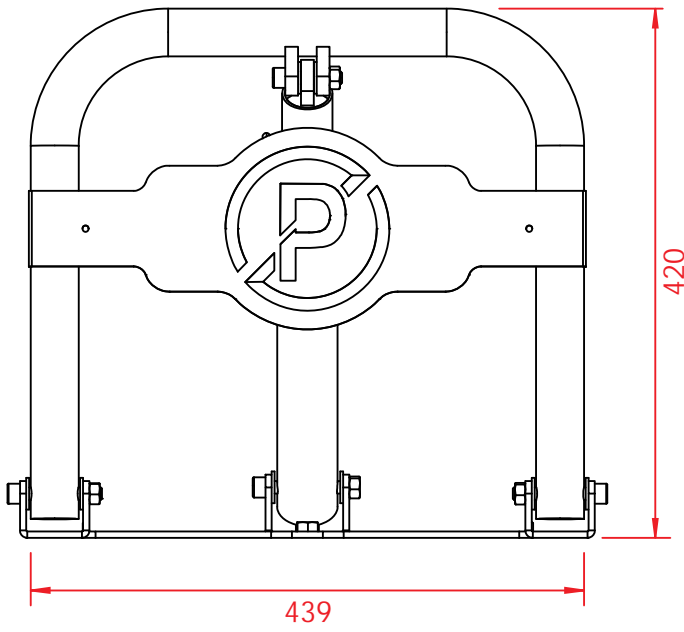

General Description

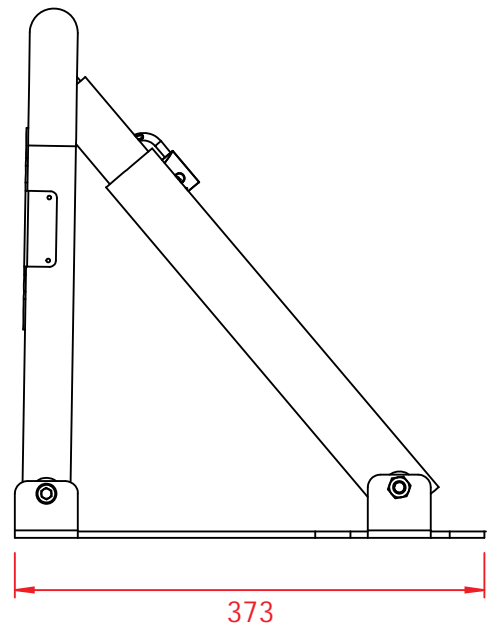

Parking Space Saver is a simple and manual vehicle access control system. PMS100 Manual Parking Barrier secure your personal parking area against forced and unauthorized entry. Manual Parking Barrier, an OPTIMA product, protect your private parking area when you are away. Since it is manual, it is easy and convenient to use. Keeping the barrier in raised position is achieved by locking a padlock.

CONSTRUCTION

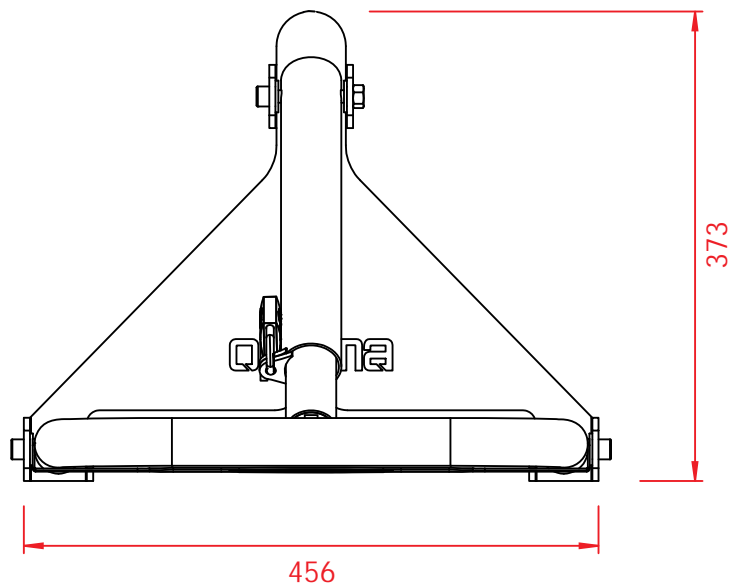

Manual Parking Barrier installation is very easy. There is template paper which provides convenience to users for installation. The template paper is placed on the floor in the parking space saver installation area. After the template paper is placed, the floor is drilled the marks on it. Parking space saver is placed on the floor and fixed with anchors and bolts. Main mechanical elements of parking space saver which are support pipe and base plate are hot dip galvanized in order to prevent rusting. Yellow colored warning sign which is placed in the middle of the barrier pipe, increases awareness of all drivers. All components are very precisely manufactured by using CNC lathe machines, laser cutting machines, bending press, etc.
